

Ordinary Tarpaulin

Commander Xtra

Additional abrasion resistant coating

• **Abrasion resistant:** The unique feature which can be found only in Commander Xtra tarpaulins. Commander Xtra is layered with an additional abrasion resistant coating. This provides an extra protective layer to the tarpaulins and reduces the damage caused due to rope tying contributing to the product's extra life and minimal maintenance.

Commander Xtra is engineered by specialists who have been in this industry for the past five decades, catering the needs of the transport sector. When it comes to transporting moisture sensitive cargo such as Cement, Sugar, Paper, Food grains etc. nothing serves better than Commander Xtra.

Outstandingly Durable

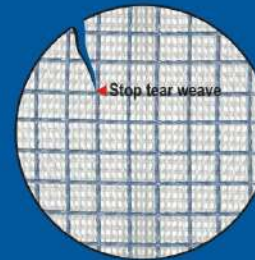

Some creations are made to last. Introducing Commander Xxtra the ace brand in truck tarpaulin. The specially designed tarpaulins from Commander Xxtra combines fabric and coating using high-end technology. The result is durable, long lasting tarpaulins with unique features that makes it the first choice for many when it comes to truck tarpaulins. Why compromise on the safety of your goods when you can give them Commander Xxtra protection.

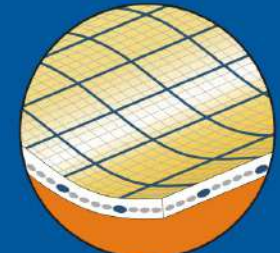

SALIENT FEATURES:

• **Stop Tear Weave:** The innovative technology which distinguishes Commander Xxtra from other tarpaulin brands in the PVC tarpaulin segment. The stop tear weave feature makes Commander Xxtra PVC tarpaulins highly resistant to wear and tear. Even if it tears due to unduly high pressure from pointy article or impact, the stop tear weave resists the propagation of tear thus avoiding further damage to the tarpaulin.

• **Glass Top Finish:** Another special feature that can be found only in Commander Xxtra tarpaulins. The glass-top finish is attained by compressing the face of fabric after being woven so that the tarpaulin surface remains flat, smooth and friction free. The process also ensures that the surface of the material is uniformly coated thereby resulting in a durable and long-lasting product.
